Mumbai, Sakinaka – 400072

## Career Summary

Full-Stack Developer skilled in Python, Django, React, and REST APIs with a focus on building secure and scalable solutions. Pursuing B.Sc. in IT (2023–2026) and certified in “Master in Full Stack Development with Python” from IT Vedant. Passionate about combining backend logic and interactive frontends to create meaningful user experiences. *Goal: To grow as a developer by solving real-world problems, improving performance, and delivering impactful tech solutions.*

## Work Experience

### Python Developer — Spyn Technologies, Mumbai

Oct 2025 – Present

- Working with Python, OpenCV, and MediaPipe to support AI wellness projects.
- Assisting in implementing features for stress detection, emotion recognition, and wellness tracking provided to clients.
- Collaborating with team members to help maintain real-time dashboards and data analysis tools.
- *Focus: Quickly learning and contributing to production-ready AI wellness solutions.*

## Key Projects

### SakinakaDiwaliTour — Travel Booking Platform

- Django-based booking system with seat tracking, payment integration, and admin controls.
- Includes travel history, mobile-friendly UI, and automated booking confirmation.
- *Impact: Delivered 24/7 booking and real-time updates.*
